

1. Get api of the Meta in it facebook , instagrame, threads
2. . need fb account
3. . mobile number for verification
4. .use case for what purpose like data transfer , user authenticate and the login
5. Connection with business portfolio required for verification
6. Required an business account manger , email, name , business name
7. Goes in the app api graph
8. Response of the fb
9. {
10. "id": "1234567890",
11. "name": "John Doe",
12. "email": "john@example.com",
13. "picture": {
14. "data": {
15. "height": 50,
16. "is_silhouette": false,
17. "url": "https://platform-lookaside.fbsbx.com/platform/profilepic/?...",
18. "width": 50
19. }
20. }
21. }
- 22.
23. If error oceur
24. {
25. "error": {
26. "message": "Invalid OAuth access token.",
27. "type": "OAuthException",
28. "code": 190,
29. "fbtrace_id": "ABCDEFG12345"
30. }
31. }
- 32.
- 33.

Now it's for the instagram

```
{  
34. "data": [  
35. {  
36.   "id": "17895695668004550",  
37.   "caption": "A beautiful day at the beach!",  
38.   "media_type": "IMAGE",  
39.   "media_url": "https://instagram.com/media/photo.jpg",  
40.   "timestamp": "2025-07-31T18:30:00+0000"
```

```
41. },
42. {
43.   "id": "17895695668004551",
44.   "caption": "Check out our new product.",
45.   "media_type": "VIDEO",
46.   "media_url": "https://instagram.com/media/video.mp4",
47.   "timestamp": "2025-07-30T15:12:00+0000"
48. }
49. ]
50. }
51.
```

Now for the threads
